

## Forming shoulders – Forming sets

Custom manufacturing of round, square and oval forming shoulders for all model types of tubular bag machines.

3D imaging software is used for a precise design as well as maximum NC-manufacturing of components.

Final assembly and trials by experienced technicians.  
Delivery including functional warranty.

## Options

- Devices for edge folding resp. sealing
- Wear-resistant coatings
- Bag spreading devices
- Gas supply and vacuum channels
- Chutes for modification of tube form (such as from round to square)
- Calibration elements for highly accurate cross sections

## Filling pipes – Funnels – Accessories

Our yesterday's **experience**  
with today's **performance**  
is tomorrow's **progress!**
